

## Delegate App Air Companion

With Air Companion you have One App for all of your events, adapted for each event by your selves and always available with a fixed price per event.

Air Companion includes for example:

- Reports with the content that you decide all selected from the Air system.
- Your personal booking with QR-code
- Agenda for the meeting general and personal.
- Messages, all messages from the system is collected in one message inbox. E-mails, Text messages and Push notifications.
- Information pages, text pages / pdf:s
- Links to websites/movies/music, Youtube/Vimeo/music.
- Maps, links to e.g. Googlemaps
- Ask questions to speakers and vote. This is performed in collaboration with Sli.do
- Surveys, forms to fill out after the event/seminar e.g.
- Presentations Speakers/Exhibitors, with text and logos
- Displaying Abstracts, searchable documents.

All functions and content in Air Companion is set up by the administrator in the Air system and it could change between different events.

Once the delegate logs in to her/his app it will be updated with all the events that the delegate has registered for, after logging in the delegate can choose event and continue. One App for all events, each event can also contain separate graphic design. With a custom-made version of the App you have the same functionality but with your own layout and icon on App Store and Google Play.

Air Companion will continually be updated with new functionality that all of our clients will benefit from. That also includes the custom-made versions will be updated.

With the flexibility you can adapt each event in the App according to any local demands e.g. languages.
